PROFESSIONAL EXPERIENCE

Associate Consultant, KPMG Global Services

Oct 2024 - Present

- Developed a Java-based automation framework integrating Selenium WebDriver for UI tests, JUnit and TestNG for unit and functional tests, reducing automation build effort by 40%.
- Transformed the framework into a modularized Spring Boot web application with a microservices architecture, boosting deployment efficiency by 20%.
- Deployed the application on Microsoft Azure Cloud, ensuring optimal performance, scalability, and security compliance.

Analyst, KPMG Global Services

Nov 2022 - Sep 2024

- Automated over 500 test cases using Opkey across platforms like Workday and Oracle, covering modules such as ERP, SCM, HCM, and EPM.
- Implemented a scheduled process solution for Oracle, introducing desktop-based automation and saving 70% in time and effort.
- Created over 900 reusable libraries within Opkey, enhancing efficiency and promoting reusability.

EDUCATION

Bachelor of Engineering

Oct 2018 - Oct 2022

Bapuji Institute of Engineering and Technology, Davangere

- Major in Computer Science and Engineering

PROJECTS

Buyer-Supplier Mapper Application

Oct 2024 - Feb 2025

- Engineered a Spring Boot application integrated with a dynamic PostgreSQL database and a robust matching algorithm.
- Developed JWT-based authentication for secure user sessions and implemented one-to-one mapping of buyers and suppliers.
- Utilized React.js for an interactive and responsive front-end, enhancing user engagement and application usability.

Buyer-Supplier Mapper Framework

Jul 2024 - Oct 2024

- Designed a comprehensive Java-based testing framework integrating JUnit, Selenium WebDriver, and TestNG for unit, UI, and functional tests.
- Created an all-in-one solution enabling seamless execution of various tests within a unified workspace, improving testing speed and accuracy.

Domain based Test Automation

Dec 2022 - Jul 2024

- Automated 500+ test cases for Workday and Oracle platforms, covering ERP, SCM, HCM, and EPM modules, achieving 70% time savings in testing.
- Built an extensive reusable library of over 900 tests, significantly enhancing testing efficiency and consistency.

SKILLS

- Programming Languages: Java, JavaScript
- Frameworks/Tools: Spring Boot, React.js, Selenium, JUnit, TestNG, Opkey
- Database: PostgreSQL
- Cloud/DevOps: Microsoft Azure, RESTful APIs, Microservices
- Certification: ISTQB Certified
